Find the missing number in an array

Problem description:-

Given an integer N and an array of size N-1 containing N-1 numbers between 1 to N. Find the number(between 1 to N), that is not present in the given array.

Sample input/output:-

The first line will be the size of the array N, and next N-1 lines will be the elements of the array.

S.No.	Input	Output
a)	5 1 2 4 5	3
b)	3 1 3	2
